

MARKTOWN UPDATE

A publication of the Marktown Preservation Society

April 2003

Old Fashion Town Meeting Held in Marktown

For the third time in less than a year, Mayor Robert A. Pastrick, Councilman Adrian Santos and a number of officials from the City of East Chicago came to our neighborhood to address issues and talk about the future of the Marktown Historic District.

Top on the list was a discussion about the new community center. One of Councilman Santos' opponents in the upcoming election had been going door to door telling people that we would never see the new center built. These rumors were put to rest when Mayor Pastrick announced "The money is in the bank, the plans are being finalized and the final approval of the project has already been obtained from the Common Council. We will be breaking ground in April or May of THIS YEAR and I hope that everyone from the community will come out for the ground breaking ceremony."

As we reported in a previous issue of UPDATE, the new community center will be approximately 13,000 square feet, more than ten times the size of the current community center. It will include a full sized basketball gym, a computer center and library, a kitchen and dining room area, crafts area and much, much more. The plans also include a fountain that I am sure we would all like to see. The new community center should take about 12 to 16 months to complete. A set of plans for the new center are on display at the present center, thanks to the architectural firm and the Marktown Preservation Society.

Dr. Raykovich addressed some of the is-

ues that were brought up at the previous two meetings. He noted that as the new community center is being built, the park behind it will be regraded and a new sprinkler system will be installed in all of the Marktown Parks.

Problems had persisted in the past with residential sewers backing up due to clogged sewer mains. The Utilities Division has made it a point of cleaning the various mains and has inspected the sewers on a regular basis to see that the problems do not occur again. Dr. Raykovich also noted that they are considering a backup generator for our current pump house.

The East Chicago Fire Department was also represented at the meeting and noted that after the night club disasters in Chicago and New Jersey, Mayor Pastrick has put together Operation Safety which includes representatives from the Building Department, Police and Fire Departments, Health Services and the Law Department. The mission of the

group is to see that similar disasters do not occur in East Chicago and to prevent the problem as opposed to respond to the disaster.

In closing Mayor Pastrick noted that each and every home in Marktown should be restored to its former glory and that he will be working

with his various department heads and the residents of the Marktown Historic District to see that this concept is no longer a dream of a few citizens, but a reality for all of the residents and property owners of the Marktown Historic District. A great deal more went on at the meeting than what we can report in a one page article in a newsletter.

If you really want to make a difference in OUR community, get active and get involved. Come out to the meetings and participate! While the neighborhood participation was good, it was not what was expected. With some luck, maybe we can get the meeting notices out a bit earlier next time.

Marktown Young Men and Women Defend and Serve Our Nation

Once again we find our great nation stepping forward to secure the liberties and freedoms of those less fortunate than us; those liberties and freedoms that we so often take for granted. In the 85 year history of Marktown, our residents, our neighbors, our sons and daughters have stepped forward to defend and serve the United States of America in the Armed Forces of our country.

Back in 1917, when Marktown was just being completed, one of our first residents, Albert Smith, the loving husband of Alma Smith enlisted in the United States Army. During World War II more than forty young men and women from our neighborhood alone served in defense of our country.

During the Korean War we know of at least one who served, a young James Bruner who was in the U.S. Marine Corps.

In Viet Nam we had at least two known to have served on foreign soil. One was John Urbelis and the other Jeff Brown.

During Operation Desert Storm there were over a dozen young men and women from Marktown who served, including all three of August Rake's children.

Today, following the most tragic events of September 11th, we find ourselves at war once again. This time, as in the past, we do so not only to protect the United States of America directly, but more importantly to end the tyrannical rule of a man so inhumane that he would kill his own people rather than to feed them.

Whether you agree with our involvement in the war or not, we must all agree to work together to lend aid and comfort to the Marktown residents who have family members serving in the armed forces of the United States.

Several weeks ago Judy Hicks began contacting Marktown residents and asking them to please provide a photograph of their family members now serving in the military. She has put together a wonderful wall display in the community center with their names and photographs.

Our prayers go out to each and every

one of the families of our young servicemen and women and we pray that their missions are accomplished and that each and every one of them returns home safely to their families and loved ones.

If you know of anyone from Marktown who is currently serving in the Armed Forces, please provide their names and address to Judy Hicks at the Marktown Community Center. If you have a 5X7" color photograph for inclusion in the display, that too would be greatly appreciated.

While the list is still incomplete, we would like to publish what we do have:

Ms Rosa Gonzalez of Spring Street has three of her five sons in the military.

Fernando Gonzalez U.S. Navy
Rudy Gonzalez U.S. Marine Corps
Albert Gonzalez U.S. Army

Mr. & Mrs. Darryl Gray of Prospect Street have their youngest daughter in the military.

Jenna Gray U.S. Air Force

Mr. & Mrs. Jose Madrigal of Spring Street have one son in the in the military.

Jose Perez U.S. Army

Lourdes & David Hicks of Grove Street have the nephew of Lourdes in the military

Daniel Munoz U.S. Army

Mr. & Mrs. Ron Grindey of Liberty Street have their son-in-law (married to Jennifer) serving as a Sergeant in the military.

Bill Herr U.S. Army

Mr. & Mrs. William McShane, who lived in Marktown for well over fifty years have their only son serving as a Colonel in the military

Tom McShane U.S. Army

Mr. & Mrs. Vitto McCormick have a nephew and a friend of theirs serving in the military.

Lee Smithermen U.S. Marine Corps
Raquel Gomez U.S. Marine Corps

Pam (O'Malley) Kubeck who is formerly of Marktown has her son serving in the military.

Nathan Kubeck U.S. Navy

Please remember each one of these brave young men and women in your prayers and give solace to their families.

The Safety of Marktown Residents is Addressed by Emergency Management Department

This past February found a number of residents wondering what to do when it was noted that the BP (AMOCO) plant had evacuated its non essential employees during a fire. Smoke and flames could be seen from Marktown and several telephone calls were placed to the Community Center enquiring as to whether or not we would be evacuating Marktown. Let's make this simple; if they are going to evacuate Marktown, YOU WILL KNOW IT!

It should be noted that emergency personnel from the City of East Chicago were in constant communication with the Whiting Fire Department and BP in reference to the problem on that day. Had they thought for one moment that any of the resident of Marktown were in danger, steps would have been made to evacuate our neighborhood.

How would that evacuation have taken place?

To begin, if ever there is a sever storm, tornado, major industrial catastrophe or an overt act of terrorism that may potentially harm our resident, the first thing you need to do is to turn your radio to **AM 1620** for information and instruction. If it is a tornado,

you will be advised to take cover in a basement of your home or workplace. If the problem requires that Marktown be evacuated, the same radio station will give you directions as to where to go.

What do you do if you don't have a radio that has AM? The City of East Chicago has covered that also. The Emergency Management Department, under the direction of George Shulock, has installed the **Community Action Network** which is an automatic system that will call all of the listed and unlisted telephone numbers in any precinct or district within our city. A message will be given as to what the problem is and what the residents should do immediately.

Before we go much further, it should be

noted that during the AMOCO fire of 1955, Marktown was not evacuated and there was virtually no damage to any of the properties. There were a few broken storm windows from the initial explosion, but that was about it. The fire of 1955 was a major industrial catastrophe that began with a devastating explosion and was not totally contained for quite some time.

Back to the business at hand. What about an evacuation of Marktown? Once the situation has been assessed and the decision is made to evacuate our neighborhood, **AM 1620** will begin broadcasting the notice, the **Community Alert Network** will call the residents and you will have more police cars in Marktown than you have ever seen before. Officers will go from door to door assisting residents in the evacuation. Buses

will be present for those at home without transportation, and all of the residents will be taken to a safe place, probably within our city.

While the community is evacuated, the area will be protected to prevent anyone from taking advantage of the fact that the neighborhood has been evacuated.

What else do we need to do? The City of East Chicago has thought of that also. The Emergency Management Department is currently putting together a brochure (in both English and Spanish) that will be distributed in the next few weeks and will provide all of the residents of East Chicago with some helpful hints and guidelines that should help each of our residents through these most difficult times.

It should be noted that this type of evacuation has NEVER HAPPENED in Marktown or in East Chicago. It is nice to know that the City of East Chicago under the direction of Mayor Robert A. Pastrick, the Common Council, and our own Councilman Adrian Santos is looking out for our safety and well being.
